Midlothian High School Competition Area

The competition area shall measure a minimum of 60' x 90'. **All competing units must be prepared to perform within the 60' x 90' space.** AIA contest sites must also accommodate a five foot "safety zone" in any space where spectators may be seated; bringing the potential measurement to 70' x 100' of gym area. If no spectators are seated on the left or right sides of the gym area, then the "safety zone" will be eliminated on the left and right sides of the competition area and can extend to the maximum of 106' from left to right.

The "competition area" at this event measures approximately 72' x 93'. All performing groups must be prepared to perform within that area. Floor tarps may not extend into the "safety zones" per rules found in the Winterguard International Adjudication Manual and Rulebook; which AIA follows.
